The Gadsden City Board of Education considers business operations of the school system essential to the central function of the school system, i.e., education. The Board of Education delegates to the professional staff the overseeing of school business operations for the purpose of providing the facilities and services that will support a good educational program and required periodic appraisal of conditions and needs relative to school facilities and services. The Board of Education requires that all aspects of operation and maintenance of the school plant, grounds, equipment, and services demonstrate that personnel place a high priority upon reasonable and prudent standards for safety, care, and promotion of pupil and staff health and also upon reasonable prudent efforts to ascertain and eliminate any potential hazardous conditions.

With the assistance of the Superintendent and personnel designated by him, the Gadsden City Board of Education shall establish efficient management procedures for fiscal accounting, purchasing, transportation, and management of equipment and supplies. It is incumbent upon each employee to enhance the educational environment by adhering to or exceeding these standards.

The Board shall also authorize adequate funds and personnel based upon the Superintendent's recommendation to insure that responsibilities concerning staff and student safety, care, and welfare are discharged responsibly.

Policy EB: Buildings and Grounds Management

Gadsden City Schools

Original Adopted Date: 07/10/2012 | Last Reviewed Date: 07/10/2012

Status: ADOPTED

The Board is fully cognizant of its legal responsibility for the care, safety, and welfare of all personnel under its jurisdiction and the concomitant need for proper management of all buildings and grounds within this district.

It shall, therefore, be the policy of the Gadsden City Board of Education to require that school properties be maintained in good physical condition. Safe, clean, sanitary, comfortable, and adequately maintained facilities are considered basic indications of efficient and legally defensible management. Their provision is, thus, to be treated as a responsibility of highest priority. The Board shall conduct periodic inspections to assure that school plants and grounds are clean, safe, and otherwise maintained properly.

The Board recognizes that to maintain the buildings, grounds, playgrounds, and equipment at such recognized legally acceptable safety-related standards, to adequately repair, alter or improve properties and to effectively plan and construct new facilities all commensurate with the requirements of the educational program and legal requirements will often require the services and skills of many trained persons. The Gadsden City Board of Education shall seek to provide safe, clean, and adequately maintained facilities for all students in the school system. In this regard, the Board shall instruct the Superintendent of Education to assure that all normal building and grounds maintenance, repairs, and improvement functions are an integral part of the Gadsden City School District educational program. The Board will also provide for necessary building maintenance services for all Gadsden City Schools. Contractual work shall be initiated after board approval and in accordance with state statutes for items which are not sufficiently repetitive in nature to justify additional employment of specialized staff or equipment.

The following indicate to the public this Board's philosophy concerning respect for public and private property:

1. School facilities and their maintenance shall reflect the commitment of this Board and the Superintendent of Education to placing care, safety, and academic welfare of students as top priorities among all Gadsden City School District goals;
2. The Board will attempt to provide clean, safe, well-maintained, and adequate buildings and grounds for the needs of Gadsden City students and professional personnel;
3. Pupils, staff, and other users shall show respect for school properties and equipment;

Additionally, land and property titles shall be duly examined and protected at the time of acquisition for school purposes. All property purchased by school organizations, activity fund accounts, or contributed by outside organizations shall become the property of the Gadsden City School District since, as stipulated by law, the title to all real and personal property accruing to this district shall be vested in the Gadsden City Board of Education.

The Superintendent shall be delegated a broad range of administrative and supervisory authority relative to the school district's buildings and grounds program. Periodic reports shall be provided to the Board relative to maintenance needs within the district, safety, utility, and attractiveness of school plants and grounds.
